OPEN LETTER TO SUBSCRIBERS

With the present issue of the Bibliography of Scientific and Industrial Reports, a new notification policy is being inaugurated for all German-language documents.

As a result of the abrupt closing out of our operations in Germany on July 1, all microfilms which were in the process of being analyzed were sent to America. Consequently we have received or are about to receive in excess of 5,000 microfilm reels, containing an average of 100 separate documents per reel. This material constitutes the total output of our German microfilm project.

To be fully useful, these reels should be made available as soon as possible. This means that the Bibliography must, within the next year at the most, release nearly 500,000 German-language documents. Since under our present system we have abstracted and released only 80,000 items in a year and a half, it is obvious that if we were to continue our previous methods, nearly six years would be required to complete the German-language material alone. In addition, a continuing flow of English-language reports, and an increasing number of Japanese documents, are to be expected.

In view of the fact that we feel obligated to complete the release of the German-language reels within the present fiscal year, we have been forced to drop our customary practice of abstracting all German-language items. The new program for handling this material will be as follows:

1. The present issue, and one which will follow sometime later, will be composed entirely of listings of the FIAT microfilm reels, giving PB number, FIAT reel number, brief subject-title of the reel in English, number of frames, and the reproduction price of each reel. The reels are classified by subject, in accordance with our usual subject breakdown.

   About half of the reels sent us from Germany were accompanied by sets of brief abstract cards. Each set covers all the articles appearing on a given reel. Whenever such cards exist, a notification of them, together with their price, will follow the notification of the reel to which the cards refer. For reels lacking these abstract cards, no abstracts will be provided by this Office.

2. After the listing of the reels and the abstract cards is completed, the Bibliography will in future issues record in English the titles of all reports on the more important reels. Each title entry will be accompanied by frame numbers and prices. It is expected that the rest of the current fiscal year will be fully taken up with these listings.

Approximately 70% of each regular issue of the Bibliography will be devoted to German-language material, reel by reel. The balance will be used to list English-language reports and a selection of the more important Japanese-language documents, all of which will appear with regular abstracts.
